Description

The Dakota Hercules paving pedestal is an adjustable support for outdoor flooring, with an adjustable height from min. 25 to max. 390 mm (depending on the model used). Each pack contains the complete disassembled paving pedestal with base, screw and self-levelling head (up to 5%) for paving with 4 removable wings for 4 mm joints. The head is equipped with an integrated anti-noise rubber shim. The model ranges from h. 150 to 270 mm and is the only one that can be extended by applying the specific h. 120 mm extension (TER09-1183 / P120). The finalization of the adjustment of the paving pedestal takes place with the floor installed using the appropriate key.

Material

Made of PP (polypropylene).

Use

Paving pedestal to be used in external areas, terraces, pavements.
