

HERMETIC CATCH PIT FOR ELECTRIC CABLES

Code	Commercial Description	Dimensions	Conf.	Pallet	Selling Unit
POZ10-1347	Hermetic Catch Pit for Electric Cables	250 x 250mm	0	96	PZ

Description

The "Airtight" drainage inspection chamber, also known as a catch basin or catch pit, is provided with hermetic seal and pre-cut outlets on the bottom, with the possibility of mounting press tube fittings. The dimensions 250 x 250 mm allows to place easily the components of the junction or electrical cables' junction, ensuring an adequate protection and tightness, due to the kit of rubber gasket and screws.

Material

Made of PP (polypropylene).

Use

Used for the grounding of electric cables, allowing the easy placement of the components of the junctions and cables and at the same time, to provide and adequate protection. This product is ideal in correspondence of poles for public lighting.
